

Prof. Dr. Eng. Mihnea Moisescu

Dean of the Faculty of Automatic Control and Computer Engineering

Prof. Dr. Eng. Mihnea Moisescu is the Dean of the Faculty of Automatic Control and Computer Engineering at the Polytechnic University of Bucharest, playing a key role in promoting academic excellence and research in the fields of automatic engineering and information technologies.

With over 25 years of experience in education and research, Mr. Moisescu is recognized for his outstanding contributions to the development of university curricula and educational standards.

As a graduate of the Polytechnic University of Bucharest with a degree in Automatic Control Engineering, Mihnea Moisescu also holds a Master's degree in Biophysics and Medical Physics from the University of Bucharest, and a PhD in Engineering specializing in automatic systems and control.

Throughout his academic career, he has published numerous scientific papers in prestigious journals and actively participated in international conferences, making significant contributions in the areas of artificial intelligence, industrial process automation, and control systems.

As Dean, Mihnea Moisescu is responsible for the strategic development of the faculty, promoting initiatives that support research and innovation. He has been involved in international research projects and industry collaborations, facilitating the transfer of knowledge and technology between academia and the private sector.
