Mr. Răzvan Bologa
Professor – Department of Computer Science at Bucharest University of Economic Studies (ASE)

Răzvan Bologa is a professor and entrepreneur in computer science, with research interests in knowledge management, artificial intelligence, and digital education. He has led a number of strategic projects in curriculum reform and digital learning.

Over the years, he has been involved in software companies, with a focus on innovative technologies and methodologies. He is currently the CEO and founder of **Nextlab.tech**, the fastest-growing adaptive learning company in Southeastern Europe.

A graduate of the Bucharest University of Economic Studies (ASE), Răzvan holds a degree in Computer Science, a Master's in Information Systems Management, and a PhD in Computer Science.

As a professor, Răzvan is committed to building strong relationships with his students, encouraging their involvement in hands-on projects and IT competitions. He is dedicated to delivering high-quality education and to enhancing students' skills in preparation for successful careers in the tech industry.

He also serves as **President of CyberKnowledgeClub (CKC)**, a non-profit organization.
